

MAGICAL SEED BOMBS

WHAT YOU NEED:

inspired by

Liven up lonely patches of dirt wherever you find them with a project that supports loads of lovable insects who are always on the lookout for a place to munch leaves, enjoy the shade and drink sweet nectar. Check back often to watch your beautiful garden grow! This project is especially successful in Spring.

STEP 1.

Take one handful of seeds, three handfuls of powdered clay & five handfuls of compost and mix together in a bowl.

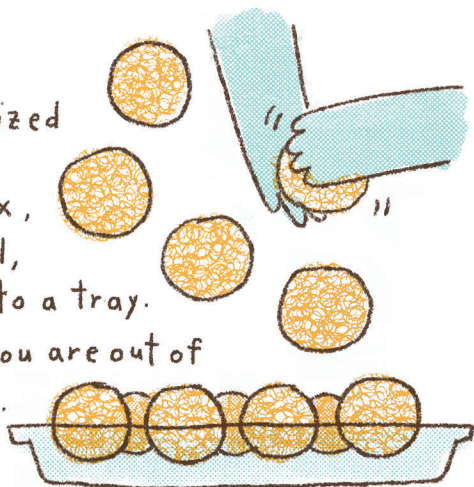

STEP 2.

Slowly add water, mixing until it's the consistency of dough.

STEP 3.

Take a golf-sized clump of the seed bomb mix, roll into a ball, and place onto a tray. Repeat until you are out of seed bomb mix. Let your seed bombs dry in the sun for several hours.

STEP 4.

Plant your seed bombs by exploding them in bare spots of your garden, tossing them onto empty green-spaces in your neighborhood and planting them in empty planters you find.

BOMBS AWAY!
